📅 23.12.2000 💼 arudev.dev

SUMMARY

Armenian software engineer based in Vienna with 5+ years of experience. Fluent in English, Russian and Armenian, and currently learning German (B1). Experienced in developing mobile, web and backend software, from courier apps for DPD to an artistic e-commerce site. Comfortable working solo or in international teams.

WORK EXPERIENCE

Full-Stack Software Engineer: Ignitix – Vienna   JUN 2023 – DEC 2024

- Developed DPD's courier navigation app used across Europe, improving delivery efficiency
- Led a small team, reviewed code, and ensured stable production releases across multiple products
- Built internal logistics tools that streamlined courier operations

Full-Stack Software Engineer: Stylink (formerly Nano) – Vienna   JAN 2022 – DEC 2022

- Developed new features across mobile, web and backend for an influencer marketing platform
- Refactored legacy codebase, improving stability and reducing crash rates by 80% and code size by 60%
- Enhanced CI/CD pipelines and test coverage, ensuring faster and more reliable releases

RECENT INDEPENDENT PROJECTS

Ghosts Art Legacy – ghosts-art-legacy.com   MAY 2025 – JUN 2025

- E-commerce site for artworks, featuring a custom animated design aligned with the artist's style

Book Club – andorrabookclub.com   APR 2025

- Website for a local reading group featuring book updates, meeting notes, and community posts

Rodmap – rodmap.com   DEC 2024 – FEB 2025

- Personalized relocation platform helping users organize documents and tasks through guided onboarding

TECH STACK

Mobile: Android (Java, Kotlin), iOS (SwiftUI), Ionic

Frontend: React, Next.js

Backend: Node.js, PHP (Yii2), Spring Boot

Data & Cloud: PostgreSQL, Firebase, Python
