Aru Enfendzhyan – Software Engineer

Vienna 1180, Austria | +43 664 420 4316 | arutyunef@gmail.com | github.com/Arutyun2312 | linkedin.com/in/aru-e-1a312a13b

Full-stack developer with a focus on mobile and web platforms, experienced in delivering high-performance apps and clean UI/UX. Proven ability to take products from idea to deployment. Skilled in working independently and in teams, with a solid foundation in TypeScript, Kotlin, Swift, and cloud services like Firebase. Known for clean code, fast iteration, and practical problem-solving

Professional Experience

Freelance Software Engineer

JANUARY 2025 – PRESENT

- Built Rodmap (rodmap.com), a full-stack web platform using React, Vite, Node.js, and Firebase
- Leading two client projects (under NDA), handling design, dev, and deployment

Full-stack developer, Ignitix, Vienna

MAY 2023— DECEMBER 2024

- Led Android courier app dev (Java/C++, Organic Maps) as part of a 3-person Agile team
- Maintained and extended courier management tools (PHP, Yii2, PostgreSQL) in collaboration with backend and QA teams

Full-Stack Developer, Nano Influence – Vienna

JUNE 2021 — DECEMBER 2022

- Worked across mobile (Swift, Kotlin), backend (Node.js, Firebase), and web (React.js) to build and maintain full-stack features
- Refactored codebase, reducing its size by 60% and crash rate by 80%, while improving CI/CD and test coverage to accelerate deployment cycles

Education: BSc Applied Data Science, Modul University Vienna (Expected July 2025)

Languages: English – Fluent, German – B1, Russian – Native
